W3C Markup Validation

It is good practice to use valid HTML/XHTML markup as it ensures that the search engines can read the website correctly as well as it improves cross browser compatibility

Web Analytics

Web Analytics Tools collect and measure information about visitor activity on a website. Well interpreted web traffic data is invaluable in determining a successfully web strategy and assessing the effectiveness of a website. At a minimum, we recommend to utilize at least one web analytics tool.

Search Console

Search Console integration provides insights into how your site is performing in Google Search. It helps identify search queries driving traffic, detects indexing issues, monitors site health, and highlights opportunities to improve visibility and ranking in search results.

Suggestions to Improve On Page Engagement

- Add Proper business related Keywords with high search volume.
- Add Proper Title, Descriptions and Content by using targeted keywords.
- Need to be in Google search Console.
- Robots.txt and Sitemap.xml is required and most important part it is.
- Post Blogs Daily On the Website.
- Need to Make More Backlinks
- The Websites Of the Competitors has to be Analyzed and should Also Make backlinks on the website on which the competitor has made backlinks.

Strategy

Complete Search Engine optimization (ON-PAGE, OFF-PAGE) Analysis, Social Media Optimization, Google Search Console has to be done along with specific targeted keywords for each location.

- **Keyword Optimization:** Use targeted keywords in meta tags, headers, and content.
- **Meta Tags Enhancement:** Optimize title tags, meta descriptions, and alt text for better visibility.
- **Page Load Speed Optimization:** Improve site speed by optimizing images and minifying code.
- **Mobile Responsiveness:** Ensure the site is fully optimized for mobile devices.
- **Content Quality and Freshness:** Keep content updated, relevant, and engaging.
- **Plagiarism Check:** Ensure all content is original and free of plagiarism.
